

Although you should be able to upload video with your Utah Microcredentials submission, there are times when video will not upload. If that happens, use the following workaround:

1. Save the video in a drive, such as your Google Drive or OneDrive.
2. Click on the video settings and make sure that the video permission is set as “anyone with the link can view.”
3. Copy the link to the video (not the link to your drive, but the link to that specific video).
4. Paste the link onto a document, such as a Word file.
5. Save the Word file and upload it in MIDAS as your video evidence. The reviewer will be able to access your video link.
